

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

PREFACE.

THE revision and enlargement of Professor W. W. Goodwin's *Greek Grammar*, republished last year, has made necessary a new edition of my First Lessons in Greek. I have taken this opportunity to submit the book to a rigorous revision. As the result of this, though the original plan of the Lessons remains unaltered, there has been not a little change in its details.

I was aware, when this book was first published in 1876, that its plan necessarily made it more difficult than books of its kind ordinarily are. I waited, therefore, with interest to see whether these difficulties, which I had thought it better for the pupil to meet at once in his first year's study and not to defer to an evil day, had been presented so gradually as to make it possible for the Lessons to be used widely in our public schools. That fact was soon established, and I think I may now say that the peculiar features of the book have met with general and hearty approval. Important among these are the introduction of the verb from the first and the subsequent development of its inflexion alternately with that of the other parts of speech, the introduction from the beginning of exercises consisting of complete sentences for practice in translation, and the development of the verb at first by moods and not by tenses.

I am glad to know that this last feature has recommended itself to teachers, and that it is now agreed that the point of view of the Grammar, which necessarily states the facts of the language scientifically, looking first to the forms of words and not to their use, is not the one to take in giving the pupil his first insight into the language considered as a means for the expression of thought. An illustration of the truth of this may be drawn from the subjunctive and optative. As was urged in the first edition, the uses of these moods in Greek, though delicate, are nevertheless clearly defined. When the beginner first learns their forms, he should at once have the more common of these uses explained to him. The proposition is the element of language, and from this individual words and forms derive their whole relational significance. But in fact, when the subjunctive and optative are not studied singly, but are presented tense by tense along with the other moods, frequently a blind and often incorrect translation of the one by *may*, etc., and of the other by *might*, etc., is allowed, as if they were independent in their use like the indicative, a translation in which the pupil has no adequate feeling of their force. It may be easier to learn the mere forms of the verb by tenses than by moods, a single tense stem being presented at a time, but in the case of a pure verb the changes of stem in the different tenses resulting from augment and tense sign can hardly be called a matter of great difficulty.

In this book, therefore, *λύω*, as the representative of pure verbs, has first been presented by moods. Its development, however, is very gradual, running through sixteen lessons. It has, moreover, been carefully borne in mind in these lessons that *λύω* is the type, and any

peculiar euphonic changes in the forms of the pure and mute verbs that have been introduced have been explained as they have occurred, generally in the foot-notes. It is at Lesson XXXV. that a systematic development of the verb by tense stems begins, though the subject of tense stems in pure and mute verbs is presented in part in Lesson XX. This part of the book has been enlarged by five lessons, and it is hoped that the verb, that one great difficulty which he who would learn Greek may not avoid, is now so fully and yet so gradually presented as to make the mastery of its forms if not easy, at least possible without discouragement.

The exercises in immediate connection with the lessons have been taken mainly from the first four books of Xenophon's *Anabasis*. They are designed from the first as a drill not only on forms but also in syntax, the simpler principles of which are early introduced and illustrated. They consist entirely of complete sentences, each of which illustrates some principle of the lesson in which it occurs. These sentences have been transferred with as little change as possible from the original. It is obvious that it will be a great advantage to those who subsequently read the *Anabasis* to have previously studied in this careful way so great a part of it. Forms, however, cannot be learned, especially by English-speaking boys, whose own language is almost destitute of inflexions, without constant and recurring practice. To supply materials for this practice there have been added to the lessons, at the end of the book, twenty-five additional exercises on forms to be taken by way of review, as the lessons proceed. In these no attempt has been made to illustrate syntax systematically, and the sentences (for

phrases have not been admitted even here) have been made as brief as possible, though each introduces one or two, often many, illustrations of the forms under consideration. These additional exercises are drawn from various sources, but mainly from excellent books for beginners by Böckel, by Schenkl, and by Kühner.

In introducing the syntax, all idioms peculiar to Greek have been carefully explained on their first occurrence, and this explanation has often been subsequently again referred to in the notes; but idioms identical with the English, as e.g. the infinitive not in indirect discourse, have been freely employed from the first. The first year's knowledge of Latin also has been assumed in introducing constructions. The last twenty lessons are intended to give a drill on the general principles of syntax, and only the largest print of the sections in the grammar cited at the head of the lessons is to be learned. If under any particular construction there is a special fact of unusual difficulty or importance, attention is called to it in the notes. It is recommended that these lessons be taken at the rate of one or two a week in connection with the author whom the class shall have taken up on finishing Lesson LX. It should be added that the English parts of the exercises of these twenty lessons are not designed as a systematic course in Greek Composition. To meet this want, an American edition of Mr. Arthur Sidgwick's *First Greek Writer* is about to be published, and so the promise of four years ago at length fulfilled.

The vocabularies, both special and general, have been made with care and from the point of view of the derivation and composition of words, on the study of which too great stress can scarcely be laid. Lessons LIX. and

LX. should be introduced early in parts, and the student taught the habit of analyzing the words in his exercises to get at their meaning. In the Greek-English vocabularies, English words that are cognate with the preceding Greek words have been printed in small capitals, borrowed words in black letter. The former show the influence of the phonetic principle, familiarly known as *Grimm's Law*. According to this law, π and ϕ will generally appear in English respectively as *f* and *b*; κ , γ , and χ , as *h*, *k* or *c*, and *g*; and τ , δ , and θ , as *th*, *t*, and *d*, though there are many exceptions. A borrowed word, on the other hand, is one transferred directly without consonantal change from Greek into English. This connection between the Greek and English words has not been traced out exhaustively. What is given is intended to be suggestive, and leaves much that may be done by the teacher.

The special vocabularies should be well committed to memory. The words in these are taken from sentences in the exercises of the lesson in which they occur, and no word is repeated. In these vocabularies, in the course of the book, the student learns over four hundred Xenophonic words in common use. The parts of the verbs have been given, without abbreviation of the forms, from Veitch. Late forms have been excluded, but forms on the other hand occurring exclusively in Homer have been given when necessary to complete the parts of a verb. When Veitch does not catalogue the verb, only the present and future are given in the general vocabulary, unless the verb has occurred also in one of the special vocabularies. In the general Greek-English vocabulary, further, the prepositions are now fully treated, the simple stems of the

verbs and the class to which the verb belongs are given, the cases accompanying the verbs stated where necessary, and the natural quantities marked. This last feature is new to this book and unusual in books of this grade. But the conviction has been growing upon me, that we ought, from the very beginning, to mark by our pronunciation the difference between $\check{\alpha}$, $\check{\iota}$, and $\check{\upsilon}$, and $\bar{\alpha}$, $\bar{\iota}$, and $\bar{\upsilon}$, just as we do between ϵ and η , and o and ω . The pupil's higher work in later years will be made easier if attention is paid to natural quantities from the start. In the English-Greek vocabulary there is no systematic treatment of synonyms, which have been given only so far as necessary to guide the pupil in his choice of words. It is scarcely necessary to add that this vocabulary is special, and not designed for use with any other English sentences than those occurring in this book.

The use of blackboards, extensive enough for the entire class, is strongly recommended. The Greek of the English exercises might the first day be put on the board, and the second day recited orally. By this use of the blackboard, classes are soon initiated into the mysteries of accentuation. The teacher should also, with the material here given, make other short sentences to be translated, both Greek and English. This additional drill should be mainly oral, and conducted rapidly. We should train not only the eye, but also the ear of our pupils.

As to the order of the words in translating the English sentences into Greek, the pupil should be warned against the wrong placing of post-positive and adjective words and phrases, and further against following the English arrangement slavishly. As a general guide he should know that in Greek the subject followed by its modifiers

PREFACE.

stands first, the verb preceded by its modifiers last, often, as in English, the verb precedes its modifiers either wholly or in part; but there are many exceptions, and too much attention should not be paid to the matter of the order of the words at first. These English sentences are for the most part translations, and for the satisfaction of teachers who may care to know the original order and choice of the words, the original sentences have been published in pamphlet form, and may be had on application to the publishers.

As is known, Professor Hadley's *Greek Grammar* is now undergoing revision. When the new edition appears, a companion pamphlet of parallel references will be prepared for the accommodation of those who, using this grammar, would like to use also the materials collected in the Lessons. These will not be numerically arranged in columns, but given in sets under the head of each lesson, repeating the references made to Goodwin's *Grammar*, a method of references, it is believed, as complete and satisfactory as could be desired.

It cannot be expected that the book as it stands, without omission or division of the lessons, will meet the wants of all schools. To make the shortening of the lessons, when necessary, easier, the exercises up to the syntax have been divided into four sections, the second and fourth of which need not be taken. The additional exercises on forms also may either be omitted or drawn from on occasion. In general, however, the book had best be taken entire, in the manner prescribed, at such rate of progress as is possible in each particular case. It is believed that ordinarily, excluding the twenty lessons on syntax, it can be completed and the class set to read-

PREFACE.

ing an author in two terms of three months each. There will be much difference of opinion, also, as to how much introductory matter should be learned before the class proceeds to the subject of inflexion, and on this account this part of the book has not been divided into lessons. The directions at the beginning of each lesson have been made as definite as possible. But it will be well for the teacher to go over each lesson with his class before they undertake it, telling them definitely what to learn and forestalling its greater difficulties.

The pleasure remains to me of expressing my grateful thanks to the many friends who have assisted me not only in the preparation of the original edition of this book but also in its revision. Neither undertaking was in itself enlivening; but the help and encouragement I have had have done much to lighten what otherwise might have proved a tedious task. The care necessary to free a book of this sort of errors is infinite; and I have no doubt that though I have spared no time or pains with it mistakes remain. These can easily be corrected in the plates, and I shall be under obligations to any one who will point them out.

INTRODUCTORY.¹

THE portions of the Grammar designated by the following numerals are to be well learnt before taking up Lesson I.² The parts which are here included of § 15, § 16, and § 17 are given that teachers who think it advisable may give their pupils at the outset a *comprehensive* view of the Euphony of Consonants, the principles of which, however, will be cited singly in the Lessons as they are needed. But these may be omitted, if thought best, until Lesson XVI. is reached. Before any attempt to learn the following paragraphs, the teacher should go over them carefully with the class, pointing out in each case how the examples illustrate the principle.

GRAMMAR³: § 1¹, with N. 1², together with the system of pronunciation given on page xi; § 2³, with N. 1⁴; § 3⁵, with N. 1⁶; § 4⁷, 1⁸ (with N. 1) and 2⁹; § 5¹⁰, 1¹¹ and 2¹²; § 6¹³, with 1¹⁴ and 2¹⁵, and N. 1¹⁶; § 7¹⁷, with N. 1¹⁸; § 15¹⁹, 1²⁰ and 2²¹; § 16²², with 1²³ (and N. 2), 2²⁴, 3²⁵, 4²⁶, 5²⁷, and 6²⁸; § 17²⁹, 1³⁰, 2³¹, and 3³²; § 18³³, 1³⁴ and 2³⁵; § 19³⁶, 1³⁷, 2³⁸, and 3³⁹; § 20⁴⁰, with 1⁴¹, 2⁴², and 3⁴³; § 21⁴⁴, 1⁴⁵, 2⁴⁶, and 3⁴⁷; § 22⁴⁸, 1⁴⁹ and 2⁵⁰; § 23⁵¹, 1⁵²; § 31.

After learning § 1¹, with the system of pronunciation, give the name and English equivalent of each letter in the following Exercise. After § 2³ and § 3⁵ point out the vowels and diphthongs and give their sounds. After § 5 classify the consonants, and after § 6 classify them a second time, *minutely*.

After the remainder of the references to the Grammar, point out and name the breathings and accents, and name the words according to their accentuation (§ 21, 2), and then pronounce the Exercise entire. (The hyphens show the division of the words into syllables according to § 18, N.)

NOTES.

¹ Up to this point the verb has been developed by *moods*. Hereafter the development will be by *tense stems*, and in doing this the conjugation of *λέω* will be repeated.

² Pages 86-91. Give the synopsis of each verb by moods across the page, first in the active, then in the middle, and then in the passive.

³ Conjugate the verb in the order of moods and voices suggested in the preceding note. The references to §§ 112-117, given in previous lessons, are not here repeated. It may, however, be necessary to review the various tables of personal endings. The teacher must decide this.

⁴ Let the pupil conjugate in the same manner the present and imperfect of *λείπω* and *φαίω*, and, if there is time, of the two other verbs given in § 111.77

⁵ The simple stem of verbs in *λω* ends either in *δ* or in *γ* (or *γγ*), § 108, IV. 1 b. The future ends respectively either in *σω* or *ξω* (or *γξω*). Hereafter, in the special vocabularies, the simple stem of each verb, when this does not appear in the present, i. e. unless the verb is of the *first class* (§ 108, 1), will be given in () directly after the present indicative. In every such case the pupil should be required to show how the present stem is formed from the simple stem, and to tell to which one of the eight classes the verb belongs.

NOTES.

¹ With the passive of many of the verbs that take the infinitive in indirect discourse (Lesson XXXI.) we either find the infinitive itself with its subject accusative as subject of the principal verb (the normal construction), or, as here, the subject accusative of the infinitive becomes the subject nominative of the principal verb. In this example, to illustrate, we might have also λέγεται Ἀπόλλωνα νικῆσαι, it is said that Apollo defeated, where the noun is the subject of the infinitive and the infinitive is the subject of λέγεται, representing the possible active construction, λέγουσιν Ἀπόλλωνα νικῆσαι, etc. λέγω, however, in the active voice rarely takes the infinitive in indirect discourse, § 260, 2, ¹⁵²³ N. T.

² of also would be correct, § 144, 2. 2nd. Reflexive. ³ § 142, 2, ¹⁵²³ N. T. ⁴ Sem. of R.

⁴ Conjugate in the same manner the second perfect and pluperfect active of *πράσσω* and *φαίω* through all the moods. Take each tense of *λείπω* and *φαίω* which you have conjugated, and analyze it, pointing out the *present stem*, the *simple stem*, *augment*, *tense stem*, *connecting vowels*, and *personal endings*.

⁵ The class of some of these verbs remains to be more fully considered hereafter: *γίγνομαι*, *πάρχω*, and *πίπτω* belong to § 108, VIII.; *λείπω* and *φείγω* to § 108, II. *Stems with strong forms.*

⁶ The present stem is a synopated and reduplicated form of the simple stem, § 109, 7, *b* and *c*, and the future and perfect middle add *ε* to the simple stem, § 109, 8. *Some stems add ε*

⁷ Mute stems which assume *ν* on *αυ* in the present have their proper form only in the second aorist; except in the present and second aorist they either lengthen the short vowel (like verbs of the second class, § 108, II.) or add *ε* (§ 109, 8). *No mute before σ, etc.*

⁸ *πάρχω* for *παρ-σχω*, § 16, 2; *περσόμεαι* for *περσ-σόμεαι*, § 16, 6, 7, 8. *Some future in Doric.*

⁹ See § 109, 7, *b* and *c*; *περσόμεαι* for *περ-σόμεαι*, § 110, II. 2, N. 2. *Some σ, etc.*

π-περ-ον is for *π-περ-ον*, which is in fact the form of the second aorist in Doric Greek.

¹⁰ The perfect is an exception to the principle stated in note 7.

¹¹ For *φεισόμεαι*, a Doric future, see § 110, II. 2, N. 2.

¹⁴ *To have fallen.* *δοκέω* in the sense *to seem* takes the infinitive in indirect discourse, usually in the personal construction. See note 1, Lesson XXXIX.

NOTES.

¹ In § 108, § 109, and § 110, learn the larger type, but merely read the notes and list of examples. No peculiarities of formation explained in these paragraphs are again referred to in the following notes.

² The numeral in parenthesis designates the class to which the verb belongs. When no such numeral occurs, the verb (except irregular verbs in *μι*) belongs to class I.

³ A hyphen prefixed to a form indicates that it occurs only in composition. For ἡγαγον, see § 100, 2, n. 4.

⁴ For ἀκ-ηκοφ-α, § 102.

⁵ For the 2 p., see § 125, 4; for the 2 a., § 125, 3.

⁶ Verbs in *μι* are divided into two classes (marked here respectively 1 and 2). Those marked 2 are a subdivision of V. of the general classification (see § 108, V. 4). All other regular verbs in *μι* (including those with reduplicated present stems, § 121, 3) are marked 1, and constitute the first class of verbs in *μι*.

NOTES.

¹ In each case let the student give the verb of the quoted sentence in its original form before quotation, and also all of its possible forms after being quoted.

² An indirect question may be introduced by the simple interrogative

^x ὅπως αὐτὰς is not used with gen. of sep. alone, but requires ἀπὸ & the gen.

(in this case *ποία*), the general relative (*ὅποια*), or even, as here, the simple relative (*οἷα*). See § 149, 2, with note, § 282, 1, and § 87, 1. For the syntax of *μένειν*, see § 261, 1. 1012, 1013, 1014; 1600; 425, 431; 1526

³ Object of *λαμβάνειν*. The original question was, *πόθεν τὰ ἐπιτήδεια λαμβάνωμεν*; See § 256.

⁴ § 277, 4. *Partic. in Condition* s § 282, 4. *Ind. Quest. with εἰ*

⁶ In translating these sentences into Greek, determine first what the quoted sentence would be in the direct form in English, *so as to get the original tense*, which in Greek, it must be carefully remembered, *does not change* when the sentence is indirectly quoted. In *English* after secondary tenses a change of tense is the rule. This makes it often doubtful what the original form of the sentence was. In such a case the student must determine which seems the most natural, and take that.

⁷ *πᾶς*. But see note 2, above.

⁸ *Whether... or, et... ή*, § 282, 5. ~~1173~~ 1606

⁹ Plural of *σκευοφόρον*.

VOCABULARIES.

I. GREEK-ENGLISH VOCABULARY.

In the following Vocabulary the simple stem of each verb, when this does not appear in the present, i. e. unless the verb is of the *first class* (§ 108, I.), is given in () directly after the present indicative.

The capital Roman numeral given immediately after the parts of a verb designates the class to which the verb belongs. See § 108. When no such numeral occurs, the verb (except irregular verbs in *μι*) belongs to class I. Verbs in *μι* are marked 1 and 2. Those marked 2 are a subdivision of V. of the general classification. See § 108, V. 4. All other regular verbs in *μι* are marked 1. See notes 2 and 6, Lesson LVI. Compound verbs are not classified, nor are their principal parts given, if the simple verb occurs elsewhere in the Vocabulary. For fuller information concerning irregular verbs, see the Appendix to the Grammar. For futures in *ω*, *ωμαι*, see § 110, II. 2, n. 1 c. Deponents that are regular have the aorist middle unless it is otherwise stated. The case required by the verb is often designated by the letters A., D., or G., immediately added to the definition of its meaning.

The gender of nouns of the first declension is not given because obvious. Nouns whose genitive is not given are of the second declension, except neuters in *ος*, which are of the third and are inflected like *γίνος*, § 52, 2.

The parts of compound words are separated by hyphens. The single dagger prefixed to a word pointing down (†) or up (‡), or the double dagger pointing in both directions (‡), points to some related word or words containing the common stem or root. When this device is not possible, the related word that shows best the stem or root follows in parenthesis.

The quantity of *a*, *i*, and *v*, when naturally *long*, is consistently marked throughout, except where such natural quantity is already indicated by the circumflex accent, as in *ἄλλος*. These vowels, when not marked, are to be pronounced *short*.

Words are to be sought for under their *themes*, though difficult forms, especially of verbs, will often be found in the alphabetical list. The old-style numerals refer to the Lessons. English words in small capitals are cognate with the Greek words, those in black letter are borrowed from them.

WHITE'S FIRST LESSONS IN GREEK, REVISED

EDITION. With references to the revised and enlarged edition of Goodwin's Greek Grammar, and printed from entirely new plates.

The publishers beg leave to call attention to the following changes which have been made in the new edition of the First Lessons in Greek.

The number of lessons has been increased from seventy-five to eighty. The five added lessons are on the verb, the treatment of which is thus distributed over more ground. By this enlargement the difficulty of single lessons on the verb is correspondingly decreased.

After *λύω* has been fully presented by moods, as in the first edition, a development of the Greek verb by tense-stems has been introduced. The seven tense-stems are now fully developed.

Contract verbs are presented, in this edition, in two lessons in place of one. The lesson on liquid verbs has been brought forward. The perfect and pluperfect middle and passive of liquid and mute verbs is now fully treated. A lesson has been added to Lessons LII. and LIII. giving in full the principal parts of twenty-five additional verbs. In the Lessons on the Formation of Words and on Prepositions it has now been possible to remove the body of the text, but the exercises of Lessons LIV. and LV. remain, and a complete set of exercises has been added to Lesson LXII.

Single words and phrases have been removed from the exercises, which now consist wholly of complete sentences. In the special vocabularies the parts of the verbs are given in full and no words are repeated. In the general vocabularies the words are more fully treated, especially the prepositions, the cases required by the verbs stated, and English cognate and borrowed words distinguished by different types.

New editions of the Pamphlet of Parallel References to Hadley's Grammar, and of the Key for the use of Teachers, are to follow.

An edition of the First Lessons in Greek is to be printed and published for the use of English schools, by Macmillan & Co. in England, simultaneously with the American edition. [Ready in July.]
